

ALEXANDRIA.

WEDNESDAY EVENING, AUGUST 8.

night, he says he is probably a kind-hearted man, but having deliberately signed the kickers' address, he cannot afford to affiliate with him any longer. The General has abandoned his proposed trip to New Mexico, but will start early in next week for Southwest Virginia, to look after some of his mining interests in that section.

From Petersburg it is learned to day that the white republicans of that district have practically determined to nominate Judge Arnold of Sussex county for Congress, and that Prof. Langston, colored, will run as an independent republican with the hope of getting the colored vote, which has an overwhelming majority in the district. The white republicans will try to deprive him of this vote by reason of his connection with the Freedmen's Bank and his once professed admiration for Governor Lee.

The House is engaged in a debate on a resolution to provide for the further investigation of the various "trusts." During the debate Mr. Springer introduced a bill to impose a tax of forty per cent. on all products subject to the control of trusts. The only opposition the resolution has so far met with has been from republicans.

It is reported here to day from the S. B. or Alexandria congressional district, that ex-Postmaster Windsor of Alexandria may be induced to allow his name to go before the republican congressional convention of that district, and that should he be nominated he will be "assisted" to no inconsiderable extent by the national republican committee. The report is to the effect that Mr. Windsor has received letters from republicans in various parts of the district urging him to accept the nomination, and that among the reasons they assign for his candidacy is the fact of the friendly personal relations existing between him and General Mahone, who, the writers say, will be disposed to exert himself specially in Mr. Windsor's behalf.

Representative Browne, of Virginia, has been directed by the House commerce committee to report a bill providing \$2,000 for the construction of a life boat according to the plan of Captain Norton who recently had a boat yard at Alexandria. Mr. Browne and Mr. Crisp, acting chairman of the House commerce committee, determined this morning that if it should be impossible to obtain a quorum of the commerce committee this afternoon to consider the proposition for an ice boat for the Potomac, they would themselves in the case and do what may be necessary to report a bill for that purpose.

General Lee in a talk with the GAZETTE's correspondent this morning about the Mt. Vernon Avenue said that though the bill proposed by the Mt. Vernon Avenue Association was not, as he had told them, the best, in his opinion, that could have been formulated to secure its object, still he had placed himself at their disposal and had followed their plan of action, and had done for that bill all that he could do, and he flattered himself, all that any other man in his place could have done.

The Senate to-day almost unanimously passed a bill that practically prohibits the further immigration of Chinese into this country. It also granted a charter to the Georgetown and Tenallytown railroad. The consideration of the Canadian fisheries treaty was then resumed, Mr. Evans making a long speech in opposition to the ratification of the treaty. The first vote on this treaty will be on Mr. Morgan's motion to postpone its further consideration until next December, but it is said that motion cannot be definitely determined, as it will require a majority of the Senate to do so, and so many Senators are away and cannot be brought back that such a majority cannot be obtained at this session.

It is reported here from Richmond that Mr. J. S. Wise says the anti-Mahone combine has gone to hell, and that he doesn't intend to go there with it, but instead, will go to New York. The heat is intense here to-day. Three people dropped dead from its effects, one of them a clerk in a store who at the time was waiting upon a customer.

J. M. Hundley, a farmer near Mount Cross, Pittsylvania county, committed suicide Monday last by shooting off the top of his head with a double-barreled shotgun. He was missed from the house, but being a bachelor, and there being only hired people on the place, no importance was attached to his absence till Tuesday, when search being made his body was found near the burial ground on the premises. Mr. Wise, of Virginia, spoke in favor of the amendment, and said that if the failure to secure even government favor without an appropriation for the fair at Richmond. He objected to helping any colored people merely because it was a colored people's exposition. He was opposed to class distinction. A white man was just as good as a colored man any day. He was willing to give a colored man his rights, but no more. The line had to be drawn somewhere, and he drew it right here.

"Do you believe," interrupted Mr. Henderson, "that a colored man is as good as you are?"

"I believe," retorted Mr. Wise, "that you are just as good as any colored man."

Mr. Henderson made no reply.

Tree claims are also taken by women, especially in Dakota.

PARIS, Aug. 8.—The funeral of General Eades, the ex-Communist who dropped dead while addressing a body of strikers Sunday, took place to-day. Fifty thousand persons gathered in the streets adjacent to the house of the deceased and thousands lined the route to the cemetery, along which cavalry was stationed. The other troops belonging to the Paris garrison were held within their barracks. Among those who attended the funeral were Henry Rochefort and Louise Michel. Many flowers and wreaths were placed upon the coffin. The procession accompanying the remains was tranquil until the Boulevard Voltaire was reached. Here the mob cheered the commune and displayed a number of red flags. A detachment of the Garde de Paris charged the crowd and captured the flags. Instantly all the are lights in the building went out and the Government exhibit and machinery hall were left in total darkness. The incandescent lights were not affected. It seems that the electric current struck the dynamo and extinguished the lights. The lightning produced a counteracting current and stopped the machinery instantly. When the current had passed the dynamos were started up again all right, and where there was darkness, again was light. The rainfall following the thunder and lightning was so heavy that the noise produced drowned the rumbling of the machinery in Power Hall. We don't get much sleep. Have to keep a guard on all the time. We don't know when they intend attacking us. We have sent to Victoria for more help and hope they will come up soon, but the Skeena river is so bad that it will take three or four weeks to get here. We do not know the moment we will be shot from the brush and dare not venture from the fort.

MONETARY AND COMMERCIAL.

NEW YORK, Aug. 8.—There was a spurt of activity in the stock market at the opening this morning, but the dealings soon settled down to a fairly active business, which was quite evenly distributed over the leading stocks. First prices, as compared with last evening's closing figures were about steady, being either unchanged or but slight fractions different either way. The subsequent trading failed to develop any special feature of interest, however, the movements in the list being confined without exception to small fractions only. The market was heavy and everything shaded off slightly. Business became dull toward the end of the hour, and at 11 o'clock it was steady at the lowest prices reached. Money easy at 1 1/4%.
